Contents Vol. 121

Petrogenesis of A-type granitoids from the Wallagga area, western Ethiopia: constraints from mineralogy, bulk-rock chemistry, Nd and Sr isotopic compositions
T. Kebede and C. Koeberl 1

Crustal evolution of the Gyeonggi massif, South Korea: Nd isotopic evidence and implications for continental growths of East Asia
S.R. Lee, M. Cho, J.H. Hwang, B.-J. Lee, Y.-B. Kim and J.C. Kim 25

Dating basaltic volcanism in the Neoarchaean Sukumaland Greenstone Belt of the Tanzania Craton using the Sm–Nd method: implications for the geological evolution of the Tanzania Craton
S. Manya and M.A.H. Maboko 35

Geochronology of basement rocks in the Kalahari Desert, Botswana, and implications for regional Proterozoic tectonics
S.J. Singletary, R.E. Hanson, M.W. Martin, J.L. Crowley, S.A. Bowring, R.M. Key, L.V. Ramokate, B.B. Direng and M.A. Krol 47

ID-TIMS using the step-wise dissolution technique versus ion microprobe U–Pb dating of metamict Archean zircons from NE Madagascar
J.-L. Paquette, B. Moine and M.A.F. Rakotondrazafy. 73

Age of the Baula PGE mineralization (Orissa, India) and its implications concerning the Singhbhum Archaean nucleus
T. Augé, A. Cocherie, A. Genna, R. Armstrong, C. Guerrot, M.M. Mukherjee and R.N. Patra . . . 85

C, O, Sr and Pb isotope systematics of carbonate sequences of the Vindhyan Supergroup, India: age, diagenesis, correlations and implications for global events
J.S. Ray, J. Veizer and W.J. Davis 103

Discussions

A discussion on papers "Nature of a major tectonic discontinuity in the Svecofennian province of northern Sweden" by Rutland et al. (PR 112, 211–237, 2001) and "Age of deformation episodes in the Palaeoproterozoic domain of northern Sweden, and evidence for a pre-1.9 Ga crustal layer" by Rutland et al. (PR 112, 239–259, 2001)
P. Weihed. 141

Reply to discussion by Pär Weihed
R.W.R. Rutland, T. Skiöld and L. Kero. 149

Geochemistry of the mafic rocks of the ophiolitic fold and thrust belts of southern Ethiopia: constraints on the tectonic regime during the Neoproterozoic (900–700 Ma)
B. Yibas, W.U. Reimold, C.R. Anhaeusser and C. Koeberl. 157

Palaeomagnetic and rock magnetic study of a deeply exposed continental section in the Charnockite Belt of southern India: implications to crustal magnetisation and palaeoproterozoic continental nucleii
J.D.A. Piper, S. Basu Mallik, G. Bandyopadhyay, S. Mondal and A.K. Das 185

PII: S0301-9268(03)00036-6

Magnetic fabrics in the Holum granite (Vest-Agder, southernmost Norway): implications for the late evolution of the Sveconorwegian (Grenvillian) orogen of SW Scandinavia
O. Bolle, H. Diot and R.I.F. Trindade 221
Sources of Svecofennian granitoids in the light of ion probe U–Pb measurements on their zircons
M. Vaasjoki, H. Huhma, R. Lahtinen and J. Vestin 251
Significance of the Tambien Group (Tigrai, N. Ethiopia) for Snowball Earth events in the Arabian–Nubian Shield
N.R. Miller, M. Alene, R. Sacchi, R.J. Stern, A. Conti, A. Kröner and G. Zuppi 263

Discussions

Carbon, oxygen and strontium isotope geochemistry of Proterozoic carbonate rocks of the Vindhyan Basin, Central India—comment
S. Kumar 285
Reply—"Carbon, oxygen and strontium isotope geochemistry of Proterozoic carbonate rocks of the Vindhyan Basin, central India"
B. Kumar, S. Das Sharma, B. Sreenivas and M.N. Rao 289

Erratum

Erratum to "Timing of deformation in the Norseman-Wiluna Belt, Yilgarn Craton, Western Australia" [Precambrian Research 120 (2003) 219–239]
R.F. Weinberg, L. Moresi and P. van der Borgh 293
